

Truma launches compact roof-mounted air conditioner

Truma is launching its new Aventa compact air conditioning system in time for the Caravan Salon 2018. As the name suggests, this appliance is extremely compact and will even fit vehicles with limited roof space. "We have developed the Aventa compact specially for vans and small motor homes or caravans," explains Bernd Gerlach, Head of European Retail Management.

Words Terry Owen

Ultra-light

Weighing in at just 27.5 kg, the new Truma Aventa compact is the lightest roof-mounted air conditioning system on the market. At the same time, it delivers efficient, extremely fast 1,700 W cooling. Thanks to its low energy consumption of 2.8 A, it is also suitable for use on camp sites with weak fuse protection.

Compact air distributor

The small air distributor is also new. Its compact design means it saves space inside the motor home or caravan as well. Four individually adjustable outlets distribute the cold air evenly to create the perfect indoor climate.

Quiet and smart

Keeping the noise level down was a key design focus. The new roof-mounted air conditioning system is very quiet and includes the tried-and-tested sleep function with reduced fan operation. Restful nights and unstressed camp site neighbours guaranteed! Of course, the Truma Aventa compact can be conveniently controlled using the Truma App and can be connected to the Truma iNet System.

The iNet advantage

By linking air conditioning and heating to its iNet Box, Truma is able to offer full climate control via a smartphone or tablet. The system operates via Bluetooth when in range and SMS when further afield. The beauty of using SMS is that you only need a 2G phone signal and it's very simple to use.

The iNet system operates with the Truma Combi, Truma VarioHeat or Alde heater to provide fully automatic climate control. You can also check the level of gas in the LPG cylinder by linking in Truma's LevelControl sensor.

Easy installation

It is not just the appliance that has been well designed – Truma has thought carefully about installation as well. Special mounting frames ensure fast, watertight installation – even on textured roofs. The Aventa can be installed very quickly in a skylight where the frame ensures that the installation is absolutely leakproof to the inside.

Additions to the Aventa family

The new Truma Aventa compact replaces the Aventa eco, Truma's previous "small" roof-mounted air conditioning system. In January 2019, the Aventa family will welcome another new member – the powerful 2,200 W Aventa compact plus. "This, together with the large 2,400 W Aventa comfort, completes our air conditioning portfolio and means we have the perfect system for every cooling requirement," says Gerlach.

Key facts – Truma Aventa compact:

Weight	27.5 kg
Cooling capacity	1,700 W
External unit dimensions	785 x 560 x 265 mm (L x W x H)
Dimensions of air distributor	556 x 496 x 46 mm (L x W x H)
Power consumption	2.8 A

Company Profile

With its strapline 'Mehr Komfort für unterwegs' ('More comfort on the move') Truma has been the leading specialist for caravan and motorhome accessories for nearly 70 years. In 1961, Truma developed the "first officially recognised caravan heater", which made winter camping possible for the first time. The company now offers an extensive range of products in the fields of digital networking, heating, hot water, cooling, manoeuvring and gas supply. Air conditioning came along in 1999 with the Saphir under bunk air conditioning systems. They are very quiet and distribute the air individually throughout the vehicle thanks to a modular piping system. Truma's first roof-mounted system, the Aventa, launched in 2011. With a cooling capacity of 2400 W, its clean lines and compact dimensions got the company off to a flying start in this sector of the

market. Since then Truma has been developing and expanding its range of bunk and roof-mounted air conditioning systems for RV owners worldwide. The new Aventas are very much part of this process. Truma is characterised by high product quality, exemplary service and a strong customer focus. Over the years it has won many awards for its products. These include the prestigious "red dot design award", which honours outstanding design features, a high level of innovation, functionality, ergonomics and longevity. The company's headquarters and production facility are in Putzbrunn, near Munich. Truma has branches in Great Britain, Italy, Sweden, China and the USA. In total, the family-owned company employs 700 people. Truma is one of the top employers and one of the top 100 innovators among German SMEs (www.topjob.de and www.top100.de).
